Posting tips

- **Add a photo or short video.** A jobsite pic, a dump truck, or a screenshot of the app's map gets 3–5× more views than text alone.
- **Pin the post** to the top of your page so new visitors see it first.
- **The link: app.eclsite.com** — Facebook will auto-detect it. If you want the clickable preview card, paste the link on its own line, wait a second for the preview to load, then you can delete the raw link text if you like.
- **Best time to post:** weekday mornings (6–9am) tend to land well with the trades crowd.
- **Reply to every comment** in the first hour — it pushes the post to more feeds.

Heads-up: the link app.eclsite.com is your live app. The first visitor after a quiet spell may wait a few seconds for it to wake up, then it's fast.
